Discussion

Afternoon Class at Sports Core

Had 1 or 2 sessions but not on current schedule

Pool memberships

Daily Rate

New; Our suggested "Couple" rate was added

	OP Resident			
	Individual	Family	Couple	
Summer	\$205	\$340	\$300	18 + \$10
Winter	\$315	\$485	\$435	5-17 \$ 8
Yearly	\$405	\$630	\$575	

Non Resident

Summer	\$280	\$465	18 + \$15
Winter	\$425	\$650	5-17 \$12
Yearly	\$545	\$850	

NOTE: Non-swimmers also pay the above daily rate except at the Sports Core pool which has a facility-use rate of \$3 for each non-swimmer entering the pool

Consider for next year; Considering how crowded the pools were this past season, especially when pool openings were being rotated due to lack of staff, should non-resident rates be increased?? If not, should there be a premium added for weekends when the pools are even more crowded?

Revisit previous suggestions for additional rates including; short term weekly rate for grandparents and family who have visitors. Charge a flat one week rate (\$125?) for up to 4 non-resident family members; This would provide pool members an added benefit of cheaper daily rate for short term visitors.

NOTE; At Saturdays Board meeting, one of the members mentioned that he argued for the addition of the "Couples" rate that we had suggested

and encouraged the committee to continue working on these types of ideas.

Lifeguard and staff shortage

Certification classes have been advertised frequently in daily and monthly publications. Both older and younger age groups have been solicited in the ads. This is important for the committee members to understand in order to explain temporary closings to customers who complain.

Maintenance/Safety issues

Last year the AAC made suggestions to the Board regarding safety concerns with the entrance ladder at the S&R pool and certain maintenance issues at several of the pools. The entrance issue with kids hanging on the ladder making it unsafe for elderly members to get in and out of the pool was addressed by saying the lifeguards would address the problem when they saw it happening. All of the maintenance issues we mentioned were addressed, but it is important that we all keep an eye out for similar issues this season.

Other??
